

## Hardtop AX

### Product description

This is a two component chemically curing aliphatic acrylic polyurethane coating. It has a high gloss finish with very good gloss retention. It has good chemical resistance. It is a high solids product. To be used as topcoat in atmospheric environments.

#### Typical use

Marine:

Recommended for topside, deck and superstructure.

Protective:

Recommended for offshore environments, refineries, power plants, bridges and buildings. Suitable for a wide range of industrial structures. Used as a topcoat in pre-qualified NORSOK systems.

### Approvals and certificates

APAS approved to specification 2911

Additional certificates and approvals may be available on request.

### Colours

selected colours over Multicolour tinting system (MCI)

### Product data

Property	Test/Standard	Description
Solids by volume	ISO 3233	63 ± 2 %
Gloss level (60 °)	ISO 2813	gloss (70-85)
Flash point	ISO 3679 Method 1	28 °C
Specific gravity	calculated	1,37-1,48 kg/l
VOC-USA / VOC Hong Kong	EPA Method 24	325 g/l
VOC-Solvent Emission Directive	SED (1999/13/EC)	238 g/kg

The provided data is typical for factory produced products, subject to slight variation depending on colour.

All data is valid for mixed paint.

Gloss level: According to Jotun Performance Coatings' definition.

### Recommended film thickness per coat

Film thickness and spreading rate	Dry film thickness	Wet film thickness	Theoretical spreading rate per coat
	(µm)	(µm)	(m <sup>2</sup> /l)
Minimum	50	80	13
Maximum	100	160	6,3
Typical	70	110	9

## Surface preparation

To secure lasting adhesion to the subsequent product all surfaces shall be clean, dry and free from any contamination.

### Surface preparation summary table

Substrate	Surface preparation	
	Minimum	Recommended
Coated surfaces	Clean, dry and undamaged compatible coating (ISO 12944-4 6.1)	Clean, dry and undamaged compatible coating (ISO 12944-4 6.1)

## Application

### Application methods

The product can be applied by

- Spray: Use airless spray or conventional spray.
- Brush: Recommended for stripe coating and small areas, care must be taken to achieve the specified dry film thickness.
- Roller: May be used. However when using roller application care must be taken to apply sufficient material in order to achieve the specified dry film thickness.

### Product mixing ratio (by volume)

Hardtop AX Comp A	4	part(s)
Hardtop AX Comp B	1	part(s)

### Thinner/Cleaning solvent

Thinner: Jotun Thinner No. 26 / Jotun Thinner No. 10

Jotun Thinner No. 10 can be used where aromatic solvents are accepted.

### Guiding data for airless spray

Nozzle tip (inch/1000):	13-19
Pressure at nozzle (minimum):	150 bar/2100 psi

### Guiding data for conventional spray

Nozzle tip (inch/1000):	11-19 (HVLP) / 1.1-1.9 mm (pressure pot)
Pressure at nozzle (minimum):	2.1 bar/30 psi (HVLP) / 2.1 bar/30 psi (pressure pot)

## Drying and Curing time

Substrate temperature	0 °C	5 °C	10 °C	23 °C	40 °C
Surface (touch) dry	4 h	3 h	2 h	1 h	1 h
Walk-on-dry	40 h	24 h	16 h	8 h	4 h
Dried to over coat, minimum	24 h	18 h	10 h	5 h	3 h
Dried/cured for service	20 d	14 d	10 d	5 d	3 d

Drying and curing times are determined under controlled temperatures and relative humidity below 85%, and within the DFT range of the product.

Surface (touch) dry: The state of drying when slight pressure with a finger does not leave an imprint or reveal tackiness. Dry sand sprinkled on the surface can be brushed off without sticking to or causing damage to the surface.

Walk-on-dry: Minimum time before the coating can tolerate normal foot traffic without permanent marks, imprints or other physical damage.

Dried to over coat, minimum: The shortest time allowed before the next coat can be applied.

Dried/cured for service: Minimum time before the coating can be permanently exposed to the intended environment/medium.

## Induction time and Pot life

Paint temperature	23 °C
Pot life	2 h

## Heat resistance

	Temperature	
	Continuous	Peak
Dry, atmospheric	120 °C	140 °C

Resistant to spills of most oils, aliphatic petroleum products and non aggressive chemicals.

Peak temperature duration max. 1 hour.

The temperatures listed relate to retention of protective properties. Aesthetic properties may suffer at these temperatures.

## Product compatibility

Depending on the actual exposure of the coating system, various primers and topcoats can be used in combination with this product. Some examples are shown below. Contact Jotun for specific system recommendation.

Previous coat:	epoxy, zinc epoxy, epoxy mastic, polyurethane
Subsequent coat:	polyurethane

## Packaging (typical)

	<b>Volume (litres)</b>	<b>Size of containers (litres)</b>
Hardtop AX Comp A	4 / 16	5 / 20
Hardtop AX Comp B	1 / 4	1 / 5

The volume stated is for factory made colours. Note that local variants in pack size and filled volumes can vary due to local regulations.

## Storage

The product must be stored in accordance with national regulations. Keep the containers in a dry, cool, well ventilated space and away from sources of heat and ignition. Containers must be kept tightly closed. Handle with care.

### Shelf life at 23 °C

Hardtop AX Comp A	48 month(s)
Hardtop AX Comp B	48 month(s)

In some markets commercial shelf life can be dictated shorter by local legislation. The above is minimum shelf life, thereafter the paint quality is subject to re-inspection.

## Caution

This product is for professional use only. The applicators and operators shall be trained, experienced and have the capability and equipment to mix/stir and apply the coatings correctly and according to Jotun's technical documentation. Applicators and operators shall use appropriate personal protection equipment when using this product. This guideline is given based on the current knowledge of the product. Any suggested deviation to suit the site conditions shall be forwarded to the responsible Jotun representative for approval before commencing the work.

## Health and safety

Please observe the precautionary notices displayed on the container. Use under well ventilated conditions. Do not inhale spray mist. Avoid skin contact. Spillage on the skin should immediately be removed with suitable cleanser, soap and water. Eyes should be well flushed with water and medical attention sought immediately.

## Colour variation

Products primarily meant for use as primers and antifoulings may have slight color variations from batch to batch. Such products may fade and chalk when exposed to sunlight and weathering.
